Saoula -Algiers • (213) 698-791-771 / (213) 540-262-515 • walide67@gmail.com • <https://walide67.github.com>

Experienced Software Developer with over 4 years of expertise in **Laravel** and **PHP**, proficient in building robust web applications and back-end systems. I also have 6 months of hands-on experience in **Flutter** development, creating efficient and user-friendly mobile applications. Skilled in working with **Docker**, **Linux systems**, and **Git** for efficient deployment and version control. Passionate about continuous learning and staying updated with the latest technologies to deliver high-quality solutions.

Experience

DECEMBER 2020 – PRESENT

Information Systems Development and Integration Engineer | Sonelgaz services (Ex: Elit) | Algiers

I developed numerous solutions using **Laravel** for an existing **CMS platform**. First one was a **survey module** that allowed clients to create and manage surveys on their websites, with advanced result viewing and filtering options using **Chart.js** and **Angular** for real-time visualization and interaction. Additionally, I created a **coming soon module** that enabled website administrators to hide content from visitors, with access granted only via specific IP addresses. The module also featured a **test mode**, allowing website administrator to connect to a secondary database for testing purposes without impacting the primary production database.

I also contributed to a **Spring Boot application** for **Sonelgaz Group**, where I developed a document management module to handle meeting documents and **integrated real-time notifications** using **WebSocket**. Currently, I am working on a platform for **purchasing cloud solutions**, utilizing **Laravel**, **Docker**, and **Angular** to build a scalable, secure, and user-friendly system.

JULY 2020 – DECEMBER 2020

Flutter Mobile Developer | Indromidainnov | Algiers

As a **Flutter Developer**, I worked on **Melyapay**, an E-Wallet application, developed using **Flutter** and **Bloc** for state management. Additionally, I developed **Melyago**, a car pooling application using **Flutter** and **Firebase**, and integrated **One Signal** for push notifications to enhance user engagement and real-time communication. Throughout these projects, I collaborated closely with cross-functional teams to align features with business objectives, optimized application performance, and managed version control using **Git** to ensure a smooth and collaborative development process.

Skills

Laravel • Angular • Git • Springboot • Bootstrap • Tailwind • Mysql • Postgres • WebSocket • Flutter • Linux • google map • firebase • one-signal

Education

JULY 2019

Master of Software Engineering | Hassiba benbouali University | Chlef, Algeria

Thesis project: recommender system : python - scikit-learn

JULY 2017

Bachelor of computer sciences | Hassiba benbouali University | Chlef, Algeria

Thesis project: chatbot using php – mysql – program-o
